Examination of Application #09/965,878

1. Claims 1, 3, 4, 6, 7, 9, 11-14, 16, and 18 of application 09/965,878, are pending in the application. This communication is in response to the amendment received 25-September-2007. Claims 2, 5, 8, 10, 15, 17, 19 and 20 are canceled. The Examiner appreciates Applicant's responses to the previous office actions, but has deemed it necessary to apply the new grounds for rejection cited below.

Claim Rejections under 35 U.S.C. § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

2.1 Claims 1, 3, 4, 6, 7, 9, 11-14, 16, and 18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

2.2 The Examiner posits that claims 16 and 18 of the present invention are computer executable software code, or a program per se, consisting of a computer program product having software instructions for simulating a war game. For at least this reason, the software instructions of the present invention do not meet the criteria for a statutory process (MPEP Section 2106.01).

In re Application of: Rodriguez

2.3

****>**Descriptive material can be characterized as either “functional descriptive material” or “nonfunctional descriptive material.” In this context, “functional descriptive material” consists of data structures and computer programs which impart functionality when employed as a computer component. (The definition of “data structure” is “a physical or logical relationship among data elements, designed to support specific data manipulation functions.” The New IEEE Standard Dictionary of Electrical and Electronics Terms 308 (5th ed. 1993).) “Nonfunctional descriptive material” includes but is not limited to music, literary works, and a compilation or mere arrangement of data.

In view of the aforementioned requirement, the Examiner respectfully contends that the claim language of claim 18 does not claim a practical application, that language claiming a computer program product having software for communicating within a network. The product holding the instructions is determined to recite data embodied on a computer-readable medium.

However, the data does not impart functionality to either the data as claimed or to the computer. As such, the claimed invention recites non-functional descriptive material, *i.e.*, mere data. Non-functional descriptive material is merely carried on the medium, it is not structurally and functionally interrelated to the medium, and thereby does not manipulate, or execute, appropriate subject matter, and thus cannot constitute a statutory process (MPEP Section 2106).

2.4 Furthermore, claims 1, 3, 4, 6, 7, 9, 11-14, 16, and 18 are determined to not meet the criteria for a statutory process due to the claimed limitations for transmitting a data packet via a signal. The newest version of the MPEP (Edition 8, Rev. 6) includes a reference to *In re Nuijten*, 84 USPQ2d 1495, which states that signals per se are non-statutory.

3. Claims 1, 3, 4, 6, 7, 9, 11-14, 16, and 18 are deemed allowable over the prior art of record at this time, pending resolution of any rejections noted above. Response Guidelines

4. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
